II. Kozlov, P. V.

Trans. of Vysokomol[ekulyarnye] Soed[ineniya] (USSR)
1959, v. 1, no. 6, p. 793-798.

DESCRIPTORS: *Cellulose esters, *Films, Surface
properties, Relaxation time.

As a result of a short thermal treatment of thin tri-
acetate films at high temperature, a significant im-
provement in their mechanical properties was found.
This treatment is connected with relaxation processes
occurring in the films which lead to a decrease in
internal stresses and to an increase in the packing
density of the molecular chains of the film-forming
substance. (Author)
